

ACTIVATION OF LEARNING MANAGEMENT SYSTEMS FOR UNIVERSITIES

Lavrynenko M.M.¹, Tasun A.², Kostyanik I.V.³, Sivykh D.G.³

¹ *Yaroslav Mudryi National Law University, Kharkov*

² *Swiss Montreux Business School, Montreux, Switzerland*

³ *National Technical University «Kharkov Polytechnic Institute», Kharkov*

Learning management system is linked fully with the student information system so:

1. The courses are set up automatically on the learning management system, if any, the student information system.

2. The inclusion; students and teachers automatically recording the decisions in their respective roles.

3. Programmer performs an automatic update of information, decisions, and users twice a day.

And is now working to achieve automatic transition grades students from the learning management system to the student information system.

A summary of the studies and research carried out to develop a system to deal with:

1. Study Weekly and monthly continuing to measure user activity on the system.

2. The quarterly study on the details of using the system, decisions, sources, interaction

3. The quarterly study to measure and analyze the reactions of the faculty.

4. The quarterly study to measure and analyze the responses of students' actions.

5. Academy graduate studies with the support of the university, such as:

a) Exploring the Influence of Instructor Presence on EFL Students Interactions in Asynchronous Computer-Mediated Communication - APMC;

b) Faculty Conceptions and Practices in ICT-enhanced Teaching Environments in Higher Education.

6. Academic studies with the support of the university designed and carried out and published by faculty members.

7. Assessment studies by independent third parties, such as the recent study by the ROI Institute to measure the impact of e-learning for education at the university and modes of development, attended by hundreds of students and teachers.

Effects

Students: • Increase awareness of the technology; • improved learning and access to knowledge; • greater consistency with the personal interaction patterns and higher.

On Members: • Organize courses better; • improve the interaction and communication; • stability of the highest quality delivery / teaching.

The university: • increase the quality of education; • a clear increase in the empowerment of students and improve their education; • enhance students' association and the university reversed a positive image of the institution.
